

**OPEN
DAYS**

**13
Settembre
2021**

**Masutti Marmi e Graniti and
Eco-sustainability: the new
green vision, the cornerstone
of the entire Masutti
organization.**

Before commencing...

*A great thank you to Gruppo Cosentino
for cooperating with us in this first meeting,
the first step of a path looking at training and information.
(and particularly to Roberto, Alberto, Andrea, Vittorio and Matteo)*

*A heart-felt, thank you to Domethix from Vicenza,
for the effective contribution to the completion of the Silestone tops
in the showroom thanks to the water fittings installed.
(especially to Mario Da Ros)*

Sustainability and Eco-sustainability

Sustainability is creating a global balance between the humans and the eco-system, to create a form of development that protects the environment and provides for the current and future needs.

Adopting an eco-sustainable life style results in the daily implementation of actions that respect the environment and the fauna from an ecological point of view.

Eco-sustainability Goal

The main objective of Eco-sustainability is to reduce as much as possible the environmental impact of any human action of planet Earth.

In brief, it involves great attention on all the productive processes; on the **reduction** to the minimum of the consumption of energy which should come from **renewable sources**. It means using biodegradable, compostable or **recycled** materials.

Some of the milestones of the Eco-sustainability are **re-cycling** and **re-using**.

<<Living>> the Eco-sustainability

Protecting the environment is everyone's duty.

Each human being, in their own small way, can and must contribute to protecting the planet from the environmental collapse by implementing the so-called Eco-sustainability good practices.

This is why in Masutti, on our daily activities we rely on technologies, procedures and eco-sustainable expedients with a low environmental impact.

Masutti is Green Friendly

Green Friendly means “friend of the environment”.

How does Masutti demonstrate this?

1. We can boast the ISO 14001 certificate, a free adherence international standard that sets the requisites for the environmental management system.
2. We produce electrical power thanks to a photovoltaic implant placed on our buildings' roofs. The supply provides for our daily need.

Masutti is Green Friendly

3. We treat the water used during the stone slabs' manufacturing process with a specific implant and in addition to that, we monitor the process for the disposal of scrap material deriving from the same treatment.
4. We launched a line dedicated to natural stones, the Natural Stones Masutti.
5. Today we present an awareness campaign concerning the re-use of wood packaging;
bring the package back, and the trees will be protected!
6. Last but not least: we work with materials which do not entail - or at least limit - the content of resins and silicones.

+

Authorized
Manufacturer

=

- 1. Client's maximum satisfaction*
- 2. Meeting the Sustainability and Eco-sustainability goals*

Masutti Marmi e Graniti.

*Not only an Eco-sustainable company,
a company that reflects, act,
reacts in a sustainable manner,
by working with sustainable materials!*

Campaign <<A recycled packaging is a tree saved!>>

Every time a packaging is returned, we will recognize a 10 Euro token.

Once 10 packages are returned, We will give you a 100 Euro voucher that can be spent on the next order In Masutti Marmi.

Thank you all for your attention and...
See you at the next meeting!
